PROFESSIONAL SUMMARY

Electronics and Communication Engineering graduate with hands-on experience in Python, Linux Administration, SQL, Excel, Power BI, AWS, and Networking through academic and self-driven projects. Skilled in Python programming, software development, system administration, troubleshooting, and data analysis. Built multiple Linux infrastructure and full-stack application projects covering web servers, databases, monitoring, and deployment. Seeking opportunities as a Data Analyst, Software Engineer, Python Developer, L1 Technical Support Engineer, or Desktop Engineer, where I can contribute strong analytical, programming, and troubleshooting skills.

Core Skills: Python Programming | Data Analysis & Visualization | SQL | Software Development | Technical/Desktop Support | Troubleshooting | Linux System Administration | Networking

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering (Hons) — Mookambigai College of Engineering, Pudukkottai | May 2022 – May 2026

CGPA: 9.06 / 10

WORK EXPERIENCE

Research Intern – Regenerative Braking in Solar PV Battery — National Institute of Technology, Tiruchirappalli | May 2024 – Jun 2024

- Investigated regenerative braking techniques for solar photovoltaic battery systems as part of an academic research internship.

Data Science with AI — Internshala | Aug 2025 – Sep 2025

- Completed a hands-on training program covering data science fundamentals, Python, and AI-based analytics tools and workflows.

GenAI Powered Data Analytics Job Simulation — Forge, TATA | Sep 2025

- Simulated a real-world data analytics role using Generative AI tools to derive business insights from datasets.

Advanced Excel with AI — Internshala | Feb 2026 – Mar 2026

- Built advanced Excel skills including VLOOKUP, Pivot Tables, and AI-assisted dashboards for data analysis and reporting.

ACADEMIC PROJECTS

Performance Analysis of Massive MIMO System using ZF and MMSE Detection — Academic Project | 2026

- Analyzed and compared Zero Forcing (ZF) and MMSE detection techniques in Massive MIMO systems using MATLAB, evaluating performance through BER and throughput simulations.

IoT Enabled Smart Container System for Safe and Efficient Food Management — Academic Project · IEEE Publication | 2025

- Designed an IoT-based smart container using ESP32 and sensors to monitor food storage conditions in real time, improving food safety and reducing wastage; work published as an IEEE paper.

AI Based Efficient Traffic Management System — Academic Project | 2024

- Developed an AI-driven traffic management system to optimize signal timing and reduce congestion using real-time traffic data analysis.

HANDS-ON PROJECTS

NGINX Load Balancing & Reverse Proxy Configuration — Hands-on Project | 2026

- Configured NGINX as a load balancer (Round Robin) and reverse proxy across Apache backend servers on Linux, improving scalability, availability, and fault tolerance.

Student Registration System (LAMP Stack) — Hands-on Project | 2026

- Built a student registration web app using Linux, Apache, MariaDB, and PHP with CRUD operations and data validation; hosted on AWS EC2.

NAS Configuration Using NFS — Hands-on Project | 2026

- Set up a Network Attached Storage solution using NFS on Linux, configuring shared exports and automatic client mounting via /etc/fstab.

Infrastructure Monitoring Using Prometheus & Grafana — Hands-on Project | 2026

- Configured Prometheus and Node Exporter to collect CPU, memory, disk, and network metrics across Linux servers, visualized through Grafana dashboards.

SKILLS

Programming & Tools: Python, C Programming, OOPs Concepts, SQL, Linux, MATLAB, Data Analysis, Data Visualization, Power BI, Advanced Excel (VLOOKUP, Pivot Tables, Dashboards), Software Development, Technical Support, Desktop Support, Troubleshooting, AWS, Networking, NGINX, Apache, MariaDB, PHP, NFS, Prometheus, Grafana, Git & GitHub, Shell Scripting, Database Management, AI-based Analytics Platforms, ESP32, Arduino, IoT Platforms, Blynk, Cloud Storage Tools

CERTIFICATIONS

Introduction to Industry 4.0 and IIoT, C Programming Language, ADAS Advanced Level 2 – Nan Mudhalvan, Personality Value Assessment – GoodSpace AI

ACHIEVEMENTS & AWARDS

Best Project Award, Best Technical Student, Consistent Award, Academic Proficiency First Place (2022–2026), Perunthalaivar Kamarajar Award (2022), IEEE Publication: IoT Enabled Smart Container System for Safe and Efficient Food Management

LANGUAGES

Tamil (Native) | English (Fluent)
